The image shows a large piece of industrial equipment, possibly a pump or generator, housed within a blue metal container. The container is elevated on a metal frame. On top of the container, there are several horizontal pipes, some of which are white and others are rusty. A yellow metal railing surrounds the top of the container. To the right, a large, cylindrical, rusted metal tank is mounted on a platform. Below the container, various mechanical components are visible, including a blue valve, a white motor, and several thick, black hoses. The entire setup is located on a gravel surface under a clear blue sky. The text 'www.PetroRigs.com' is overlaid in the center of the image.

A photograph of an industrial rig deck. In the center, a piece of machinery, possibly a generator or engine, is mounted on a metal platform. To the left, a large coil of silver flexible hose hangs from the rig's structure. The deck is paved with gravel, and various metal structures and pipes are visible in the background under a clear blue sky. A watermark is overlaid on the image.

A large, blue-painted industrial container, likely a water tank or storage tank, is situated on the deck of an offshore oil rig. The container has several circular access ports and valves. On top of the container, there is a complex arrangement of pipes, valves, and a yellow metal frame structure. The background shows other parts of the rig, including yellow railings and various pieces of equipment, under a clear blue sky. The ground is covered in gravel.
