

Key Features

- **Modular, Stackable Design:** The UWD-15 system's design facilitates flexibility in various drilling scenarios, allowing for efficient configuration and installation.
- **Metal-to-Metal Sealing:** The system employs reliable metal-to-metal annulus seal assemblies, enhancing the integrity of the wellhead and minimizing potential leak paths.
- **High Load Capacity:** It can support substantial casing loads, with the first position hanger capable of suspending up to 2 million pounds of casing with a 15,000 psi Blowout Preventer (BOP) test.
